 $88.9H \times 58.7W \text{ cm}$ $35H \times 23 \text{ 1/8W in}$

TREATMENT REPORT

TREATMENT REPORT

Some alpha cellulose paper pulp in 3% methyl cellulose was added to the skinned area on the verso in order to provide some support in these places.

EXAMINATION

GENERAL CONDITION NOTES

The artwork is in very good condition and has little or no signs of yellowing or discolouration. Some small losses in the red ink are mostly a result of small accretions that were either present before the printing took place or fell off since, leaving a disturbance in the red. Typical of the screen printing process. Slight abrasions to the surface, a result of stacking or handling in the past have resulted in some surface dirt on the white and slight loss in the silver ink. The verso has adhesive residue from previous hinges that have since been removed. There is a partially erased annotation in graphite above the number, cataloguing of previous owner.
